ABSTRACT

Designed to answer those questions about the Arizona community colleges most frequently asked by legislators, state and external agencies, citizens, and college staff and students, this factbook offers organizational, financial, and enrollment data for the state as a whole and individual colleges. Section I presents the State Board's statement of philosophy and provides statistics on expenditures of and certificates issued for the Board and central staff. Section II provides data on personnel in the community college districts, including certified personnel and non-teaching personnel. Section III presents information on income and expenditures for a variety of sources, including general fund current operating expenditures, state aid income, cost and income factors, plant investment and debt retirement, and a general revenue and expenditure chart. In section IV, enrollment data are presented, including full-time student equivalent history, vocational enrollment and state aid, headcount enrollment history and characteristics, and other data. Finally, section V describes federal vocational education funding, funded vocational education projects, and skill centers. This section includes a curriculum inventory matrix. (JMC)

INTRODUCTION

In 1960 the Arizona Legislature adopted Chapter 119, which provided for junior college districts in the State of Arizona. However, the Arizona Community College System really began when Eastern Arizona College was admitted to the system in 1962 and Phoenix College in 1963. In 1971, the name was changed to "Community College" System.

The Arizona Community College System was established not only to provide educational facilities in localities where students resided but to relieve the load on existing state universities created by the increasing demand for higher educational opportunities.

A State Board of Directors was appointed to oversee the system. This State Board now consists of 15 members appointed by the Governor for seven-year terms. There are also three other members on the Board -- a representative of the Board of Regents, the Superintendent of Public Instruction, and the director of the Division of Vocational Education.

STATEMENT OF PHILOSOPHY

The philosophy of the Arizona community college system is a reflection of the purpose of a free democratic society: government of, by and for the people. This can best be achieved by an educated populace so that all may exercise intelligently and morally the rights, privileges and duties of self-government. This entails the affirmation that each individual has worth and dignity, must be afforded an opportunity to develop skills and talents, and must share the responsibilities of providing educational services with the community.

Further, the philosophy recognizes that education is a vital life-long process that -- like the society to which it responds -- is never static nor completely realized. Education in a democratic society aims to equip all members with the knowledge and techniques necessary for coping with the economic, social and political dynamics affecting not only the individual but also the community.

It is therefore appropriate that the individual, the community and the state should share the financing and governance of the community college system. At the district level, fiscal and educational policy can be determined by local needs. At the state level, it is imperative to establish standards, and to assess and coordinate needs and services in the best interest of the state.

Because the communities in Arizona differ widely in demographic, economic, and geographical characteristics, the community colleges of Arizona must be permitted relative autonomy and a variety of curricula. But each community college must be committed to the following objectives:

1. To offer the first two years of baccalaureate parallel or preprofessional courses of the highest quality, so that students enrolled in transfer programs may complete study for the baccalaureate in four-year colleges and universities.

2. To provide occupational programs in technical, vocational, and paraprofessional fields leading to an associate degree or a certificate, and to provide retraining and upgrading of skills in these fields, so that students enrolled in occupational programs are qualified to meet current needs of the labor market.

3. To provide appropriate general education for all citizens, so that they may perform their personal and professional roles more effectively and exercise their obligations and privileges as citizens more intelligently.

4. To offer programs in continuing education for those who wish to improve professional skills, acquire new ones, or expand their fields of knowledge and general interest.

5. To provide sound academic and occupational counseling, including job placement services, so that students may learn to define their goals clearly and pursue them realistically.

6. To provide cultural and community service programs for the enrichment of the community, and to encourage the use of community college facilities and services by all citizens of the community for educational and cultural purposes.

Finally, a democratic society prizes and values individual differences. The role of the community college is to encourage men and women of all ages to develop their skills and talents differently, each according to abilities and interests, so that collectively they contribute to the continuum of democracy.

* New formula for state aid enacted.
** New formula for capital outlay state aid enacted for districts with less then 5,000 FTSE.
*** State aid prorated; formula not followed on operational and capital outlay funding due to budget cuts.
**** Formula not followed on capital outlay funding due to budget cuts. In 1984-85 the capital outlay state aid figure includes an additional $1 million as matching capital outlay dollars.
***** Due to legislative budget cuts, operational state aid was considerably lower than entitlements provided by statute.

*FTSE enrollment from 1972-73 through the present indicates averaged FTSE for the Fall and Spring semesters. State aid is based on the averaged FTSE enrolled for the year, as per Arizona Revised Statutes. FTSE equals the total number of student credit hours generated per year divided by 30. Beginning in 1981-82, short-term and open entry, open exit FTSE are also included. Beginning in 1989-90, summer FTSE is also included.

Skill Centers

Another dimension of postsecondary education may be experienced at one of Arizona's Skill Centers. There are three centers which are located in Maricopa, Pima, and Pinal counties. These centers are unique operations that have existed in Arizona since 1962. Their purpose is to train unemployed and underemployed persons for entry or re-entry into the labor market. Even though each Skill Center is responsible to the local community college district, they maintain a great degree of autonomy.

Skill Centers do not require a high school diploma for entry although students are encouraged to take advantage of the tutoring and testing available for a General Education Development (GED) certificate. In order to be truly responsive to the needs of students, the open-entry/open-exit concept is utilized. Students may enroll on any day of the week, and they receive their certificates of completion the day they are "job-ready".

Listed below are some of the training clusters offered at one or more of Arizona's Skill Centers:

- Accounting and Payroll
- Airline Applicant Pool Enhancement
- Auto Body
- Business and Office Education
- Computer Based Programs/Occupations
- Facilities Maintenance
- Federal Correctional Institutions
- Food Preparation/Service
- General Instrument
- Health Occupations
- Hotel Operations
- Machine Trades
- Manufacturing Technology
- Meatcutting
- Mechanical Maintenance
- Printing
- Retail Skills

Degrees, Certificates, or Licenses

Associate of Arts - This is a college transfer degree and is recommended for students who plan to complete the first two years of a baccalaureate program at the community college. Because the first two years of a baccalaureate program vary considerable among curriculums and institutions, it is usually necessary to design the course work for this degree to satisfy the curriculum outlined in the catalog of the university to which the student intends to transfer.

Associate of Applied Arts - This degree is awarded to students who complete requirements of a specified two-year program.

Associate of Science - This is a college transfer degree and is similar to the Associate of Arts degree, except that the student's major emphasis is in science or engineering course work.

Associate of Applied Science - This degree is awarded to students who complete the requirements of a specified two-year program.

Associate of General Studies - This degree is awarded to students who complete an approved two-year planned program in general studies.

Certificate - A certificate is awarded to students who have completed an approved vocational program. The length of time necessary to complete certificate programs varies depending upon the achievement of the technical skills and competence necessary in a specific program.

License - A license is awarded to students who have completed a program of study approved by the licensing agency. These programs vary according to the specific licensure requirements.
